Description: The curriculum is designed to train front line health workers to provide culturally responsive services in Michigan communities. Each of eight [8] CHW core competencies are presented in modules that promote the development of skills needed to become gainfully employed as a community health worker and enhance the knowledge base of those already employed. The internship consists of field experiences in local agencies where the focus is for the student to apply and integrate their course work into practice. CHW'S who are currently employed will complete internship at their place of work. To maintain CHW certification, participant will need to complete 20 Continuing Education Units (CEUs) every two years and annually renew members on the MiCHWA CHW Registry (\$30 per year). Please visit <http://www.michwa.org/chw-training/> for more information
